

Web-based Client

```
graph TD; Client[Web-based Client] -- "GET /points" --> GeoJSON[GeoJSON Server]; Client -- "GET /lines/:id" --> Tile[Tile Server];
```

The diagram illustrates a web-based client architecture. At the top, a box labeled 'Web-based Client' has two outgoing connections. The left connection is labeled 'GET /points' and points to a box labeled 'GeoJSON Server'. The right connection is labeled 'GET /lines/:id' and points to a box labeled 'Tile Server'.

GET /points

GET /lines/:id

GeoJSON Server

Tile Server
